

**ISO 45001: Top five
nonconformities**

**Helping you
prepare for your
ISO 45001 audit**

Managing health and safety risks is critical to reducing the number of incidents in the workplace. Businesses across the globe are faced with numerous health and safety challenges, from ill-health and accidents to damaged protective equipment. ISO 45001:2018 the international health and safety standard improves employee safety, reduces workplace risks and creates better, safer working conditions. The standard requires all events to be taken into consideration and have adequate actions to address these incidents and nonconformities.

Nonconformity, or failing to meet a specific criteria in the standard, can happen at any level of an organisation's operations from quality control and manufacturing to personnel procedures. If the nonconformance is not addressed, organisations will not meet achieve certification.

To help organisations prepare for their ISO 45001 audit, Olivier Fauroux LRQA's voice on Health and Safety discusses the top five nonconformities that our auditors identified during ISO 45001 audits since its publication in 2018.

Top 5 nonconformities

CLAUSE 8.1

Operational planning and control

CLAUSE 6.1

Accions to address risks and opportunities

CLAUSE 9.1

Monitoring, measurement, analysis and performance evaluation

CLAUSE 8.2

Emergency preparedness and response

CLAUSE 5.4

YOUR FUTURE. OUR FOCUS.

About LRQA:

By bringing together unrivalled expertise in certification, customised assurance, cybersecurity, inspection and training, we've become a leading global assurance provider.

We're proud of our heritage, but it's who we are today that really matters, because that's what shapes how we partner with our clients tomorrow. By combining strong values, decades of experience in risk management and mitigation and a keen focus on the future, we're here to support our clients as they build safer, more secure, more sustainable businesses.

From independent third-party auditing, certification and training; to technical advisory services; to real-time assurance technology; to data-driven supply chain transformation, our innovative end-to-end solutions help our clients negotiate a rapidly changing risk landscape – making sure they're shaping their own future, rather than letting it shape them.
